

John M. Abowd is the Edmund Ezra Day Professor of Industrial and Labor Relations and Professor of Information Science at Cornell University, Research Associate at the National Bureau of Economic Research (NBER, Cambridge, MA), Research Affiliate at the Centre de Recherche en Economie et Statistique (CREST, Paris, France), and Research Fellow at the Institute for Labor Economics (IZA, Bonn, Germany). In 2007, he was elected Fellow of the Society of Labor Economists. He has served as Director of the Cornell Institute for Social and Economic Research (CISER) and as Distinguished Senior Research Fellow at the United States Census Bureau. Prof. Abowd has taught and done research at Cornell University since 1987, including seven years on the faculty of the Johnson Graduate School of Management. His current research focuses on the creation and use of linked, longitudinal data on employees and employers. In his work at the Census Bureau he provided scientific leadership for the Longitudinal Employer-Household Dynamics Program, which produces research and public-use data integrating demographic surveys, economic surveys, and administrative data. The LEHD Program's public use data products include the Quarterly Workforce Indicators (<http://lehd.did.census.gov/led/index.html>), the most detailed time series data produced on the demographic characteristics of local labor markets and OnTheMap (<http://lehdmap2.did.census.gov/>), a user-driven mapping tool for studying work-related commuting patterns. His original and ongoing research on integrated labor market data is done in collaboration with the Institut National de la Statistique et des Etudes Economiques (INSEE), the French national statistical institute. As Faculty Fellow in Cornell's Institute for the Social Sciences, he is a member of the Networks Theme Project (2005-2008 "Getting Connected: Social Science in the Age of Networks"), where he is studying the network structure of employment and wages as employer and worker connections evolve over time. Prof. Abowd's other research interests include statistical methods for confidentiality protection of micro data; international comparisons of labor market outcomes; executive compensation, again, with a focus on international comparisons; bargaining and other wage-setting institutions; and the econometric tools of labor market analysis. Prof. Abowd is currently the Principal Investigator or Co-Principal Investigator for multiyear grants and contracts from the National Science Foundation, the National Institute on Aging, and the U.S. Census Bureau. He has published articles in the *American Economic Review*, *Econometrica*, the *Review of Economics and Statistics*, the *Quarterly Journal of Economics*, the *Journal of the American Statistical Association*, and other major economics and statistics journals. Prof. Abowd served on the faculty at Princeton University, the University of Chicago, and the Massachusetts Institute of Technology before coming to Cornell. When he is not traveling to Washington and Paris for his research program, he enjoys polishing his French and playing many different sports.
