CEP Tour Safety Guidelines

- Open toed shoes or sandals are NOT permitted.
- High heeled shoes are NOT permitted. Shoes worn must be satisfactory to walk on open grating with openings roughly one by three inches in dimension.
- Wearing hard hats is required and are provided at the facility.
- Wearing safety glasses is required and are provided at the facility. Regular safety glasses and safety glasses that fit over regular prescription non-safety glasses are provided.
- Hearing protection is recommended and provided at the facility.
- Due to the open grating on various floor levels at the facility and possible burn hazards, dresses, skirts and shorts are discouraged and long pants are recommended.

Safety Briefing

The CEP in an operating power plant and as such contains various potential safety hazards. When touring the facility, guests are instructed not to touch or brush against any equipment, piping, ductwork, walls, etc. The environment can be hot, dusty and noisy. Guests are required to follow directions and stay with the tour guide at all times. Other potential hazards include high temperature/pressure steam, medium voltage power, high pressure fuel, and overhead hazards due to maintenance and/or construction activities.

If an emergency arises during the tour, the tour guide will evacuate guests to one of three emergency exits and rally points and ensure everyone is accounted for. (See attached floor plan)

Special Circumstances

Tour guide should explain any safety related special circumstances happening at the facility during the tour, i.e. Boiler 1 removal.

Notes to tour guide:

1. The maximum tour group recommended is 10-15 people. Larger groups should be split up with multiple guides.
2. The safety briefing provided above must be read aloud to the tour group.
3. A head count must be taken and a sign in sheet for the tour group must be completed and carried by the tour guide during the tour to be able to account for everyone in case of an emergency.
