

## ***Books and Book Chapters***

### 2220 Passive Properties

Aidley DJ (1998). *The Physiology of Excitable Cells* (Cambridge University Press, Cambridge).

Atwood HL (1982). Synapses and neurotransmitters. In: Atwood HL, Sandeman DC (eds.), *The Biology of Crustacea, Vol 3, Neurobiology: Structure and Function* (Academic Press, New York), ch. 3.

### Axon Guide, Chapter 1

Benson JA, Adams WB (1989). Ionic mechanisms of endogenous activity in molluscan burster neurons. In: Jacklet JW (ed.) *Neuronal and cellular oscillators* (Marcel Dekker, New York), pp. 87-120.

Brown RH, Cannon SC, Rowland LP (2013). Diseases of the nerve and motor unit. In: Kandel ER, Schwartz JH, Jessell TM, Siegelbaum SA, Hudspeth AJ (eds.), *Principles of Neural Science* (McGraw Hill, Newark), ch. 14.

Byrne JH (2009). Postsynaptic potentials and synaptic integration. In: Byrne JH, Roberts JL (eds.), *From Molecules to Networks: An Introduction to Cellular and Molecular Neuroscience* (Academic Press, San Diego), ch. 16.

Byrne JH, LaBar KS, LeDoux JE, Lindquist DH, Thompson RH, Teyler TJ (2009). Learning and memory: Basic mechanisms. In: Byrne JH, Roberts JL (eds.), *From Molecules to Networks: An Introduction to Cellular and Molecular Neuroscience* (Academic Press, San Diego), pp. 539-608.

Byrne JH, Shepherd GM (2009). Electrotonic properties of axons and dendrites. In: Byrne JH, Roberts JL (eds.), *From Molecules to Networks: An Introduction to Cellular and Molecular Neuroscience* (Academic Press, San Diego), ch. 4.

Delcomyn F (1998). *Foundations of Neurobiology* (W.H. Freeman, New York), ch. 9.

Duncan G (1990). *Physics in the Life Sciences* (Blackwell Scientific Publications, Oxford), ch. 10-11.

Eckert R, Randall D, Augustine GJ (1988). *Animal Physiology: Mechanisms and Adaptations* (W.H. Freeman, New York), ch. 7.

### Electricity, Appendix A, Current Flow in Neurons

Fields HL (1976). Crustacean abdominal and thoracic muscle receptor organs. In: Mill PJ (ed.) *Structure and Function of Proprioceptors in the Invertebrates* (John Wiley and Sons, New York), pp. 65-114.

Glaizner B (1968). Pharmacological mapping of cells in the suboesophageal ganglia of *Helix aspersa*. In: Salánki J (ed.) *Neurobiology of Invertebrates* (Plenum Press, New York), pp. 267-284. [Reprinted 2012 by Springer, ISBN 1461586208]

Grass Instrument Company (1990). *The Crayfish Stretch Receptor*. Pamphlet accompanying live demonstration at the 20th Annual Meeting of the Society for Neuroscience, St. Louis.

Greenspan RJ (2007). *An Introduction to Nervous Systems* (Cold Spring Harbor Laboratory Press, Cold Spring Harbor NY), ch. Chapter 1.

Hill RW, Wyse GA, Anderson M (2012). *Animal Physiology* (Sinauer Associates, Sunderland MA), ch. 14.

Hille B (2001). *Ion Channels of Excitable Membranes* (Sinauer Associates, Sunderland MA).

Hoyle G (1983). *Muscles and their Neural Control* (John Wiley and Sons, New York), pp. 483-525.

Johnston D, Wu SM-S (1995). *Foundations of Cellular Neurophysiology* (MIT Press, Cambridge MA), ch. 7.

Junge D (1981). *Nerve and Muscle Excitation* (Sinauer Associates, Sunderland MA), pp. 2-7.

Kandel ER, Schwartz JH, Jessell TM, Siegelbaum SA, Hudspeth AJ (2013). *Principles of Neural Science* (McGraw Hill), ch. 21-22, 35-36.

Katz B (1966). *Nerve, Muscle, and Synapse* (McGraw-Hill, New York), pp. 17-19.

Koester J, Siegelbaum SA (2013). Membrane potential and the passive electrical properties of the neuron. In: Kandel ER, Schwartz JH, Jessell TM, Siegelbaum SA, Hudspeth AJ (eds.), *Principles of Neural Science* (McGraw Hill, Newark), ch. 6.

Kostyuk PG (1968). Ionic background of activity in giant neurons of molluscs. In: Salánki J (ed.) *Neurobiology of Invertebrates* (Plenum Press, New York), pp. 145-167. [Reprinted 2012 by Springer, ISBN 1461586208]

Levy J (2011). *Poison: An Illustrated History* (Globe Pequot Press, Guilford CT).

Loeb GE, Gans C (1986). *Electromyography for Experimentalists* (University of Chicago Press, Chicago).

- Malenka RC, Siegelbaum SA (2001). Synaptic plasticity: Diverse targets for regulating synaptic efficacy. In: Cowan WM, Südhof TC, Stevens CF (eds.), Synapses (The Johns Hopkins University Press, Baltimore), ch. 9.
- McCormick DA (2009). Membrane potential and action potential. In: Byrne JH, Roberts JL (eds.), From Molecules to Networks: An Introduction to Cellular and Molecular Neuroscience (Academic Press, San Diego), ch. 5.
- Meech RW, Mackie GO (2007). Evolution of excitability in lower metazoans. In: North G, Greenspan RJ (eds.), Invertebrate Neurobiology (Cold Springs Harbor Laboratory Press, Cold Springs Harbor NY), ch. 22.
- Mercer AL (1999). Changing the way we perceive things: Sensory systems modulation. In: Katz PS (ed.) Beyond Neurotransmission: Neuromodulation and Its Importance for Information Processing (Oxford Univ. Press, Oxford), ch. 6.
- Miles FA (1969). Excitable Cells (Heinemann Medical Books, Ltd., London), ch. 4.
- Moller P (1995). Basic elements of electrocommunication systems. In: Moller P (ed.) Electric Fishes: History and Behavior (Chapman and Hall, London), ch. 8.
- Moore JW, Stuart AE (2007). Neurons in Action: Tutorials and Simulations Using NEURON (Sinauer Associates, Sunderland MA).
- Murray RW (1983). Test Your Understanding of Neurophysiology (Cambridge University Press, Cambridge), pp. 51-58.
- Nicholls JG, Martin AR, Fuchs PA, Brown PA, Diamond ME, Weisblat DA (2012). From Neuron to Brain (Sinauer Associates, Sunderland MA), ch. 16.
