

QUIPU AS68

Museum identification: No. 3882 (Museo Nacional, Lima, Peru)

Main cord: color MB:CB:YB:ØG:W

- § 3.0 cm: group of 7 pendant cords (1-7), then space of 0.5 cm.
- 5.0 cm: group of 5 pendant cords (8-12¹), then space of 0.5 cm.
- 7.0 cm: group of 6 pendant cords (13-18²), then space of 0.5 cm.
- 9.0 cm: group of 7 pendant cords (19-25), then space of 0.5 cm.
- 11.0 cm: group of 7 pendant cords (26-32), then space of 0.5 cm.
- 13.0 cm: group of 7 pendant cords (33-39), then space of 2.0 cm.
- 16.0 cm: group of 7 pendant cords (40-46), then space of 0.5 cm.
- 18.0 cm: group of 7 pendant cords (47-53), then space of 0.5 cm.
- 20.0 cm: group of 7 pendant cords (54-60), then space of 0.5 cm.
- 22.0 cm: group of 7 pendant cords (61-67), then space of 0.5 cm.
- 24.0 cm: group of 7 pendant cords (68-74), then space of 0.5 cm.
- 26.0 cm: group of 7 pendant cords (75-81), then space of 0.5 cm.
- 28.0 cm: group of 7 pendant cords (82-88), then space of 0.5 cm.
- 30.0 cm: group of 7 pendant cords (89-95), then space of 0.5 cm.
- 32.0 cm: group of 7 pendant cords (96-102), then space of 0.5 cm.
- 34.0 cm: group of 7 pendant cords (103-109), then space of 1.5 cm.
- 37.0 cm: group of 6 pendant cords (110-115), then space of 0.5 cm.
- 39.0 cm: group of 6 pendant cords (116-121), then space of 1.0 cm.
- 41.5 cm: group of 7 pendant cords (122-128), then space of 0.5 cm.
- 43.5 cm: group of 6 pendant cords (129-134), then space of 1.5 cm.
- 46.0 cm: group of 6 pendant cords (135-140), then space of 1.0 cm.
- 48.5 cm: group of 6 pendant cords (141-146), then space of 11.5 cm.

61.5 cm: group of 7 pendant cords (147-153), then space of 0.5 cm.
 63.0 cm: group of 7 pendant cords (154-160), then space of 0.5 cm.
 65.0 cm: group of 7 pendant cords (161-167), then space of 0.5 cm.
 67.0 cm: group of 7 pendant cores (168-174), then space of 0.5 cm.
 69.0 cm: group of 7 pendant cords (175-181), then space of 0.5 cm.
 71.0 cm: group of 7 pendant cords (182-188), then space of 0.5 cm.
 73.0 cm: group of 7 pendant cords (189-195), then space of 0.5 cm.
 75.0 cm: group of 6 pendant cords (196-201³), then space of 0.5 cm.
 77.0 cm: group of 7 pendant cords (202-208), then space of 0.5 cm.
 79.0 cm: group of 7 pendant cords (209-215), then space of 0.5 cm.
 81.0 cm: end ¢

Observations

1. Spaces appear between pendants 10 and 11 and between pendants 11 and 12. Therefore, the group of the 5 pendants numbered 8 through 12 probably originally had 7 pendants.
2. Space appears between pendants 15 and 16. This group probably had 7 pendants.
3. Space appears between pendants 197 and 198. This group probably had 7 pendants.
4. By spacing there are 32 groups. Larger spaces appear after the sixth, sixteenth, and twenty-second group. The spacing, color patterning and values are best described by considering the quipu

to be in two parts (Part I is the first 16 groups and Part II is the last 16 groups). Each part consists of 3 sections: section A is 1 group; section B is the next 5 groups; and section C is the last 10 groups. Hence,

5. Basically each group contains 7 pendants. With the exception of positions 4 and 6, the color pattern is consistent from group to group. For positions 1, 2, 3, 5, 7, it is W, MB, CB:YB, YB, YB. Position 4, with one exception, is CB:YB in Part I and LA in Part II. In Part I, position 6 is CB in section A, CB or \emptyset G in section B, and \emptyset G in section C; in Part II, it is omitted in section A, CB or omitted in section B, and CB in section C.
6. There is only one subsidiary on one pendant on the entire quipu.
7. (a) The values in section A are, in general, position by position, the sum of the values in the five groups in section B or the order of magnitude of the sums. This is presented in Table 1 below.

TABLE 1

		1	2	3	4	5	6	7
Part I	A	5928	1120	2002	94?	1948	?	0
	Sum of groups in B	5928	1120	1177	?	1904	1662	384
	A	5513	934	2000- 2999	1283	1287	-	686
Part II	Sum of groups in B	4521	934	2771- 2879	1047	1317	?	685

(b) The values in section B are, position by position, the order of magnitude of the sum of the 10 groups in section C. This is presented in Table 2 below.

TABLE 2

	1	2	3	4	5	6	7
Range of B values	1157±390	244±113	590±418	216±89	370±194	?	199±132
Sum of C groups, Part I	1027	250	222-319	223	244	356	87
Sum of C groups, Part II	815	167-176	528-537	295	260	?	56

(c) In only one case is a value in section B the exact sum of the 10 values in section C in the comparable position. This occurs in Part I position 6. The value in position 6 in the second group of section B is the sum of the 10 values in position 6 in section C.

(d) In Part I, for pendant positions 1, 2, 3, the following holds: there is a consistent ratio of (the sum of the values in the 5 groups in section B) / (the sum of the values of the last 5 groups in section C). The ratio is $11.83 \pm 1.4\%$. Similarly in Part II, position 1, the ratio is 11.84. (Positions 2 and 3 of Part II contain breakage. From what remains, it can be seen that the ratio does not hold for position 2, but might for position 3.)

8. The relative magnitude of values in comparable groups in Parts I and II is consistent for positions 1, 2, and 3. For each of the 16 groups, the values in Part I are greater than the values in

Part II in positions 1 and 3, and the values in Part II are greater in position 2.

9. There are some additional relationships between sums of 5 consecutive groups in section C of the quipu. If P_{ijk} represents the value of the pendant in the i^{th} part ($i=1,2$), the j^{th} group of section C ($j=1,2,\dots,10$), and the k^{th} position in the group ($k=1,2,\dots,7$), the relationships can be represented as follows:

(a)

$$\sum_{j=1}^5 P_{1j5} = \sum_{j=6}^{10} P_{2j4}$$

(b)

$$\sum_{j=5i-4}^{5i} (P_{1j1} - P_{2j1}) = P_{i,10,1} \quad \text{for both } i=1 \text{ and } i=2.$$

10. AS68 and AS47 are associated. For a detailed discussion see AS47.
